Depending on the product group, all our products are made from ferritic and/or austenitic steel. They are manufactured in monolithic welded, bonded, or bolted construction, appropriate for the product. All furniture is equipped with adjustable feet and a protective equipotential pin.

SPECIFICATIONS:

1. SINK UNITS

- pressed with a slope towards the sink compartment and a draining board (grooved or flat)
- lowered along the perimeter in relation to the top edge of the tabletop
- reinforced with bonded metal profiles (omega)
- unblinded hole for a 33 mm tap
- 40 mm flat rear upstand as standard

2. SINK COMPARTMENTS

- made of stainless steel
- fitted with a 52 mm siphon hole

3. UNIT LEGS

- made of 40x40 mm square profiles
- +25 mm to -5 mm adjustable feet

4. TABLE BASES

- reinforced with a metal frame or square profile in the upper part
- 150 mm clearance between the floor and the bottom edge of the profile, shelf, or furniture bottom

5. DOORS

- made of two layers of metal sheet in the form of a stiffened box
- fitted with a magnetic latch
- fitted with a recessed ABS handle

6. SLIDING DOORS

- with stainless steel internal guide and moved by rollers
- cradle at the bottom for easy disassembly of the doors
- recessed ABS handle

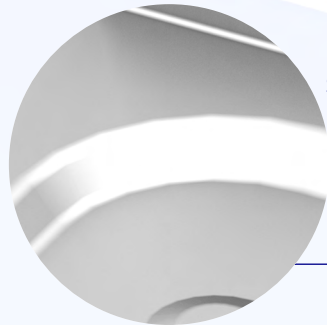

7. DRAWERS

- made of stainless steel
- guide rails made of galvanized steel, three sections, ball-bearings, full drawer extension
- toolless assembly and disassembly of cabinet body guides
- drawer front panel made of two layers of metal sheet in the form of a stiffened box
- maximum load up to 25 kg
- recessed ABS handle

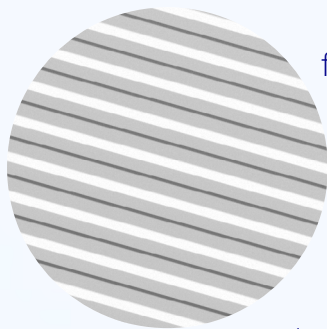

Portfolio of Sink Units

Discover Benefits of New Tabletop Design & Construction

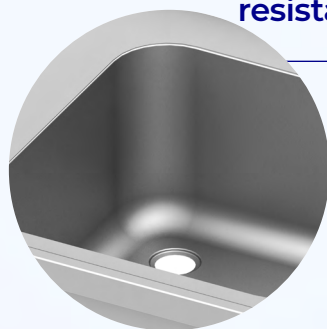

Uniform material structure of the tabletop with rounded inner edges of the recesses to facilitate cleaning.

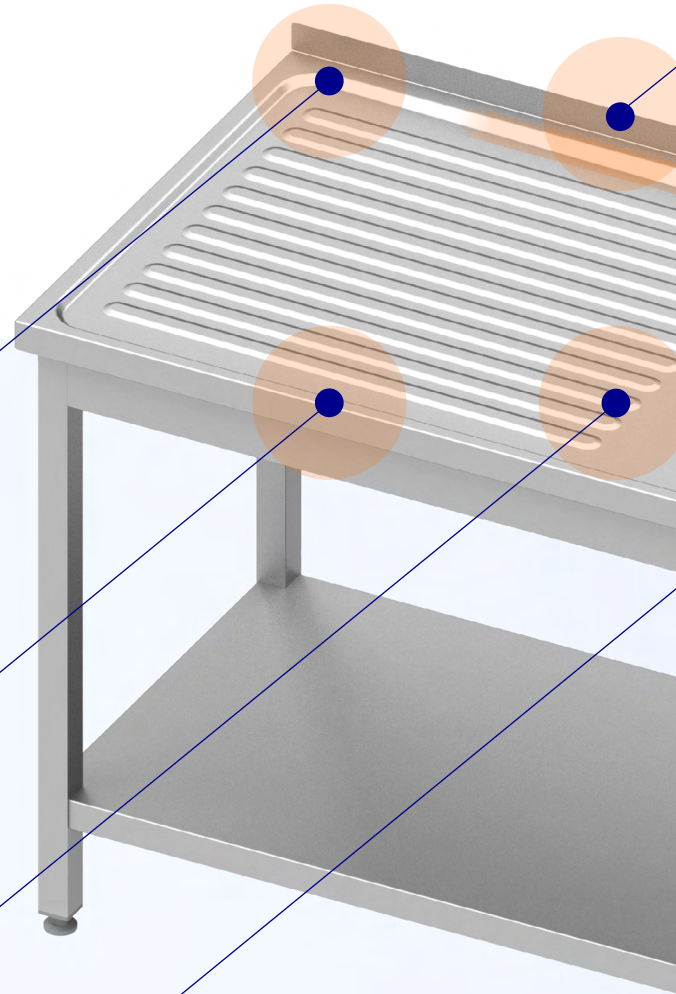

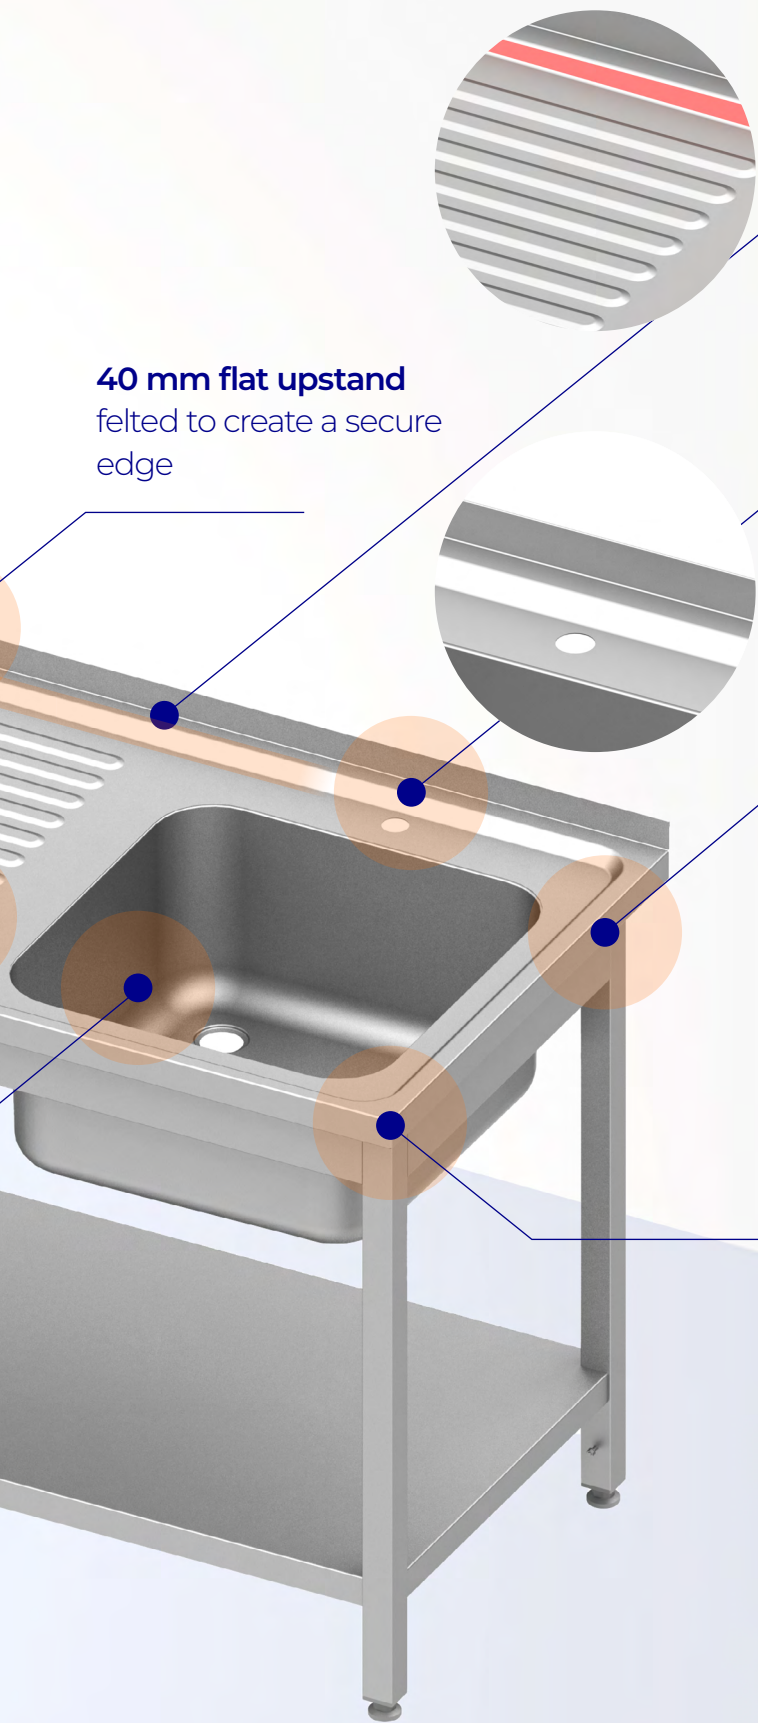

Pressed **grooved draining board for free water drainage** from under the products or items to be dried.

Rigid structure due to stamping technology and a grooved draining board.

Tabletop and sink compartments **made of AISI 304 steel with high resistance** to corrosive agents.

Directional, pressed slope for easy water drainage from the tabletop surface.

40 mm flat upstand
felted to create a secure edge

33 mm **hole for tap** ready to install sink tap available from Stalgast without additional construction changes.

Tabletop **reinforced with metal profiles (omega type)** bonded using an innovative technology without welding or visible welding points.

Welded corners

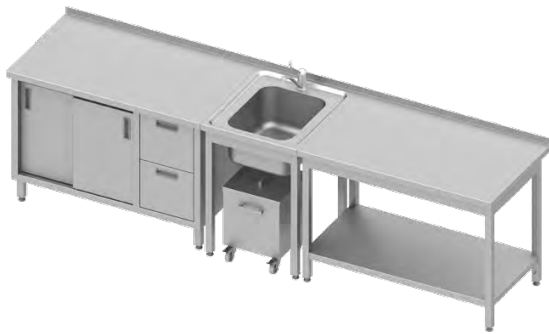

For design modifications, see the table of additional services on pages 3–4.

Portfolio of Sink Units

Tips: How to Select Sink Units

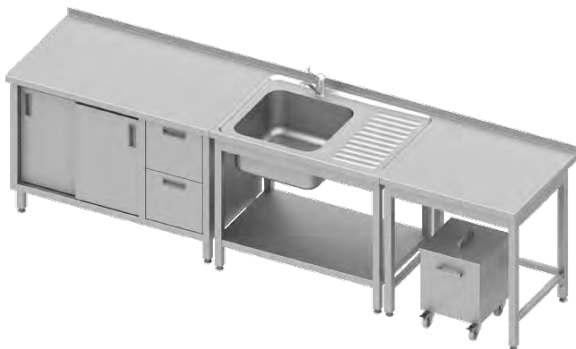

with pressed tabletops depending on process purposes

Single- or double-sink units with a pressed tabletop without a drip surface and with the minimum possible structural dimensions prove useful in functional arrangements where processes require only a maximum flat working surface, which can be obtained by adding an adjacent table with a flat work surface, e.g., to cut food or place tabletop equipment, rather than a drip surface.

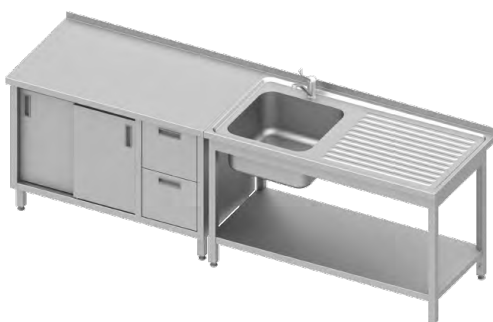

See 3D model view

Single- or double-sink units with a pressed tabletop and a minimum drip surface width prove useful in functional arrangements where processes require an optimized draining surface with small amounts of products and a maximum flat working surface, which can be obtained by adding an adjacent table with a flat work surface, e.g., to cut food or place tabletop equipment.

See 3D model view

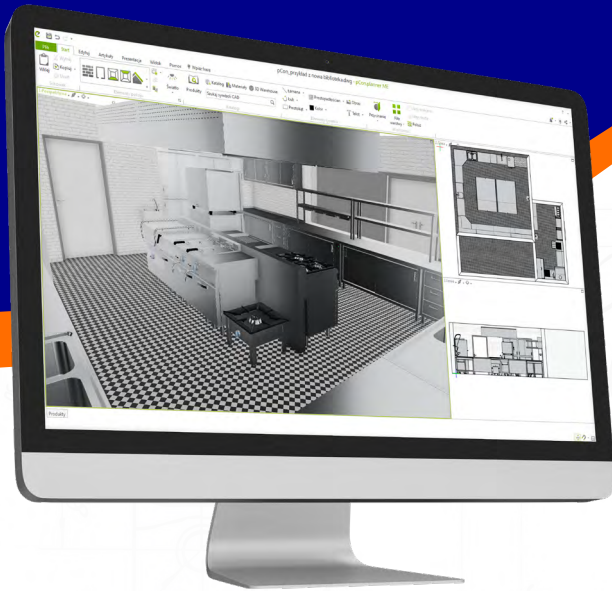

Wide single- or double-sink units with a pressed tabletop, characterized by a large draining surface, prove useful in functional arrangements where it is required to maximize the surface area to support technological processes with a large number of products and depending on the available design space, a flat work surface optimal for the processes.

See 3D model view

The portfolio of sink units with pressed tabletops includes a variety of under-tabletop constructions, such as frames with or without shelves, frames with cabinet and drawer modules, or cabinets with hinged or sliding doors. This allows for tailoring solutions for user needs based on process, functional, and ergonomic needs.

Discover the advantages of 3D design using Stalgast's product library, which includes a wide selection of our products. The updated library lets you see our product portfolio and implement complex projects with Stalgast professional equipment.

- streamline your offering and design processes
- simple and effective design
- create more accurate offers
- ensure better understanding of your solutions and faster decision-making by the customer
- eliminate the risk of mistakes during design changes by generating the current list of products directly from the software
- user friendly

**SINGLE-SINK UNIT WITHOUT A SHELF
H=850 MM**

- recessed tabletop
- 40 mm flat upstand
- screw-joined table for self-assembly
- legs joined using bolts
- furniture shipped unassembled
- 33 mm tap hole in the middle of the compartment
- available tabletop depths (D): 600 mm or 700 mm
- 600 mm table fitted with a 400x400x250 mm compartment
- 700 mm table fitted with a 500x500x250 mm compartment
